GENERATOR CONTROL SOLUTIONS

The DGC-2020 Family provides flexibility and reliability for gas and diesel gensets across the globe!

- Mission Critical Power
- Rental Units
- Offshore Drilling
- Marine
- Emergency Standby
- Prime Power Units
- Oil Field
- Telecomm

Basler Electric Company has decades of experience providing quality and reliable genset control and protection.

Thousands of Basler's dependable genset controllers are installed in critical applications worldwide.

Unsurpassed performance and reliability make the DGC line of controllers the clear choice for any genset control needs.

DIGITAL GENSET CONTROL SOLUTIONS

DGC-2020HD

DGC-2020ES

DGC-2020

- Multiple genset and engine controllers for a variety of applications.
- Technical notes and specialists are available to assist with finding the right solution for all of your application needs.
- BESTCOMSPlus® programming software with BESTlogic™Plus allows for easy customization of control schemes.
- A DGC-2020HD or a DGC-2020 with the LSM-2020 allows for easy paralleling of gensets, network load sharing, and breaker control.
- An easy-to-use HMI and our PC software is available in multiple languages for the global market.

CEM-2020H

LSM-2020

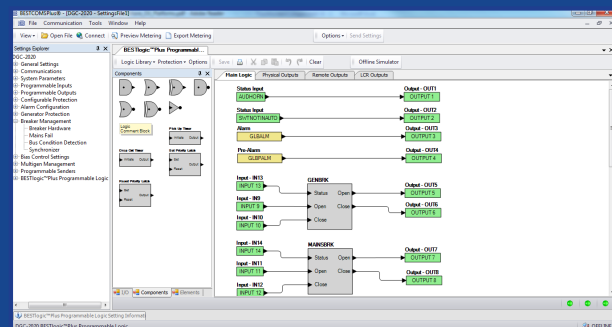

AEM-2020

VRM-2020

Expansion Modules

- Analog and contact expansion modules allow for the replacement of smaller PLC systems.
- VRM-2020, when used with DGC-2020HD, provides excitation to the field of a brushless exciter.
- All genset controllers are NFPA 110 compliant.
- Environmentally rugged construction provides years of reliable service in harsh environments.

BESTlogicPlus

More than 70 years of experience providing reliable, high performance products and services to the power industry

- 24/7/365 support
- Field Service Engineers for commissioning and troubleshooting support
- Regional technical support worldwide
- Application and design support
