

CDL Isolated Repeater

Application

The Monico CDL Isolated Repeater is designed to isolate and to provide signal boosting over long cable runs, up to 1000 feet, using only normal 120 ohm characteristic impedance communications wire. The unit requires 9-35 VDC and is designed to accept any polarity. It provides 3000 V of Galvanic Isolation on both input and output ports.

Specifications

- 2-wire CDL Operation
- -40—85 C Operating Range
- 3000 VDC Isolation for 1 Second
- 9-35 VDC Power Input, Any Polarity
- Under 1 Watt Power Consumption
- 6.5" H x 3.875" W x 1.3125" D
- Input/Output Ports Interchangeable
- 6 LED Function Lights for Easy Troubleshooting
