Dear Rick,

Marty Kubiak asked that I send specifications on engine water temperature with regards to the TV 8.540 Perkins engine XE 30123U 542251N in a gen set.

A maximum permissible water outlet temperature varies with pressure cap setting. Thus with a 7 psi cap setting, the maximum permissible water temperature is 217°F at sea level. In the subject engine you will see between 198°F and 208°F at full load because of the thermostat tolerance for full open. Other words, the data on drawing for thermostat 2485604 states:

Start To Open			Full Open	
<u>Nom</u>	<u>Min</u>	<u>Max</u>	<u>Min</u>	<u>Max</u>
180°F	171°F	185°F	198°F	208°F

I trust that this information will answer your requirements.

Regards,

The SALES PROSPECTOR® will increase your sales, boost your profits, and save your time and energy. It is a monthly "prospect research" report for sales representatives and other business people interested in industrial, commercial and institutional expansions and relocations in new or existing buildings. Reports are available for regional or national coverage. Subscription rates and coverage are shown on the last page.

QUINCY, Mass. -- A joint venture of Ricciardi Co., 281 Willard St., Quincy, Mass. 02169 (617/479-2424) and Campanelli, Inc., 1 Campanelli Dr., Braintree, Mass. 02184 plans to develop a \$45 million office and residential condominium complex on the three-acre Bargain Center site in Quincy Square, Quincy according to James E. Lydon, city planner. The site will be purchased for a reported \$3 million, and the complex will be designed during a one-year period as The Bargain Center phases out its business. Boston Five Cents Savings Bank will be a third principal in the venture. Size and construction schedules were not available.

WHITEFIELD, N.H. -- Thermo Electron Corp., 101 First Ave., Waltham, Mass. 02154 (617/890-8700), maker of paper machinery, health monitor devices, and power generation systems, will build and operate a \$25 million, 15-megawatt, wood-burning powerplant at Whitefield, N.H. 03598 in a joint venture with Whitefield Power and Light Associates, a New Hampshire partnership. The plant will burn woodchips and will sell its entire output to Public Service Co. of New Hampshire. Construction will get underway by mid-year with completion set for mid-1988.

UNCASVILLE, Conn. & FALLS CHURCH, Va. -- The Technical Products Division of UNC Resources, Inc., P.O. Box 984, Uncasville, Conn. 06832 will double the size of its 60,000 sq. ft. plant and spend \$4.9 million on new equipment, aided by a \$9 million industrial revenue bond issue approved by the State of Connecticut according to Ray Jicka, director of corporate relations. The division will add 160 persons to its 200-person staff. The expansion will enable the company to meet a \$40 million backlog for its product line of naval nuclear assemblies and aerospace components. The parent firm, UNC Resources, Inc., is at Crescent Plaza, 7700 Leesburg Pike, Falls Church, Va. 22043 (703/821-7900).
