Isuzu

Instructions:

1) Serial Number Identification

Isuzu Powered Engines

Isuzu Serial Numbers are located and stamped on the engine block. For all models, the location of the Serial Number is on the Charging Alternator side of the engine (Figure 1) and visible above the Charging Alternator itself (Figure 1). For the model TLG12SPX the Engine Serial Number is located under the Starter and printed into the engine block (Figure 5).

Figure 2

Komatsu

Komatsu Powered Engines

Komatsu Serial Numbers are located on a printed Data Plate (Figure 2). The location can change from model to model however; the Serial Number will always be printed on a data plate (Figure 2).

Kubota Powered Engines

Kubota Serial Numbers are located on a decal positioned on the Valve Cover (Figure 3). The decal may move from model to model but it will always be located on the valve cover (Figure 3).

Figure 3

Kubota

John Deere Powered Engines

John Deere Serial Numbers are located on a printed Data Plate located behind the fuel filter on the block of the engine (Figure 4). All models will have the same location and Data Plate.

ALL VERIFICATIONS MUST BE MADE BY A QUALIFIED ELECTRO/MECHANICAL TECHNICIAN. MQ POWER IS NOT RESPONSIBLE FOR ANY MISINFORMATION OR NON-LOCATED SERIAL NUMBERS RESULTANT FROM UNQUALIFIED PERSONNEL AND/OR VANDALISM.
