Electric Power Division February 2005

Baseframe Change D13P2 to D20P4S Enclosed Units

Market:	Electric Power – PSNA only
----------------	----------------------------

Application:	Olympian North America Diesel Generator Sets 13 to 20 ekW. Models affected are as follows: D13P2, D18P2, D20P4, D13P2S, D17P2S, D20P4S with CAL Sound Attenuated Enclosures
---------------------	--

Description:	The baseframes of the above models have been redesigned to bring into line with the design of other models in the Olympian range. Changes include removal of forklift pockets, and changing option FTB3 from a bundled non-UL Listed fuel tank, to a single wall fuel tank integral to the baseframe. An integral battery tray replaces the independently assembled tray previously offered, reducing the need for separate parts with one battery clamp now required instead of two battery clips.
---------------------	---

New Baseframe Design

Pricing Information:	Pricing is not affected.
-----------------------------	--------------------------

Availability:	Available now.
----------------------	----------------

Marketing Tools:	Updated Spec Sheet available on EMC: LEHF3080-04.
