

No.: 08 AP-9
July 7, 2008

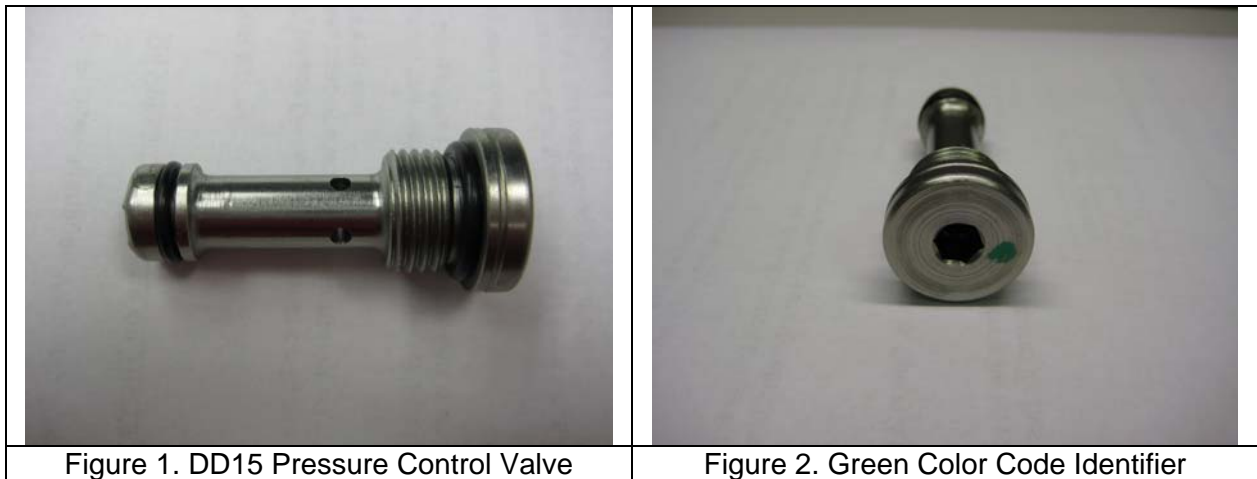

TO: Service Locations
Attention: Parts Mangers, Service Managers, Product Support Managers

FROM: John Leidlein
Manager, Quality Assurance
DDC, Parts Distribution Center

SUBJECT: **Recall DD15 Pressure Control Valve, Part Number A0000789449**

GENERAL INFORMATION

Detroit Diesel Quality has detected a potential concern regarding the DD15 Pressure Control Valve, P/N: **A0000789449**, which was shipped to customers as part of their Required Stocking List. For this reason, we have been advised to recall all distributor and dealer shelf stock. Good stock can be identified by verifying a green color code identifier located on the end of the Pressure Control Valve (see Figures 1 and 2).

To accomplish this request, we are asking that any stock (both distributors and dealers) that does not contain the necessary green identifier be returned. Detroit Diesel Distributors should file a Return Request using the on-line Return Parts System located on the Extranet ([HTTP://www.detroitdiesel.com/ops/rpmain.asp](http://www.detroitdiesel.com/ops/rpmain.asp)). When filing your claim, you need to select, R.P. type "Recall". After your R.P. is approved, please return your stock to the address below:

Detroit Diesel Corporation
Attn: Quality Assurance
515 11th Street S.E.
Canton, Ohio 44707

FLLC Dealers should file a PAR request with their facing PDC following normal Freightliner Dealer return procedures.

Since this part is a component of the DD15 Required Stock List you will need to order a replacement part through the normal ordering process. The part number has not changed.

This action is taken in the interest of continuing quality of Genuine Detroit Diesel Service parts. We appreciate your cooperation, and apologize for any inconvenience this may cause you or your dealers. *We are requesting that all distributor and dealer returns be completed no later than August 1st, 2008.*

Regards,

John Leidlein
Quality Assurance Manager
