SUBJECT: **New Version of VCU Software for MBE On-Highway Engines**

ISSUE

There will be a new release of VCU software for MBE on-highway engines; diagnostic 156, version 14.26 software. The software was released the week of April 2, 2007.

VCU 14.26 features include:

- Improvement of Road Speed Limiter feature
- Idle Protection feature – defaulted for all MBE 4000 engines only

REQUIRED ACTION

After installing DRS 6.10, the VCU 14.26 software will automatically be downloaded from the Detroit Diesel server.

ADDITIONAL INFORMATION/NOTES

Upgrading your VCU to software version 14.26.

After installing DRS software version 6.10, refer to the Upgrade_VCU document located on the DRS CD.
