Prices effective July 1, 2006
Supersedes all previous price lists

Price List and Order Information

All prices shown are f.o.b. factory and are subject to change without notice. Prices in effect at time of order apply. Any manufacturer's tax or sales tax will be added to these prices at the option of DDC/MTU Power Generation.

List prices shown are the basis for trade discounts and are not intended as resale prices.

Stock Code:

- 1—To be stocked by dealers and distributors.
- 2—To be stocked by distributors.
- 3—To be stocked by distributors if warranted by local demand.
- 4—Slow-moving part. To be stocked if warranted by local demand.
- 5—Very-slow moving special part. Order only as needed. May not always be available.
- 6—Newly added parts with no usage history.

Disposition Code:

- C—Use old part until stock is depleted, then order new part number. Do not fill orders for new part numbers with old part.
- D—Discontinued part—use stock. Not to be returned for credit—Nonreturnable.
- F—Life Time Buy Material—Nonreturnable except within six months of being designated stock code "F" in the price list update.

Standard Package:

Although most service parts are available in standard packages of one, some parts are sold in packages of 5 or 10 pieces. Specification sheets are shipped in standard packages of 25 pieces. Sales brochures are shipped in standard packages of 50 pieces. Refer to the standard package column of your service parts price list, MP-5426. To order literature with a standard package of greater than one piece, order in multiples of the standard package. Order quantities of less than the standard package or a multiple thereof are rounded to the next highest multiple of the standard package.

For example, if you need 20 copies of a spec sheet with a standard package of 25 pieces, order 25 pieces. If you need 60 pieces of that spec sheet, order 75 pieces. If you order 60 copies, 75 copies will be shipped.

Service Parts 1

Six-digit part numbers of format **L-NNNNNN-LL**. Where “L” represents alpha (letter) characters and “N” represents numeric digits. Not all part numbers contain alpha prefixes and/or suffixes. Primary order is by the six-digit base part number. Secondary order is by suffix. **Prefixes and suffixes must be used when ordering parts.**

This section includes some seven-digit part numbers of format NN NNN NN. Where “N” represents numeric digits. These are listed in numerical sequence as if part numbers contained no spaces. Seven-digit part numbers generally denote Kohler Engine components.

Most common hardware components contain the letter X as a prefix and are of the format **X-NNNN-NNN**. Where “N” represents numeric digits and indicates the maximum number of digits that will appear in the part number. The number of digits for the first set of “N” digits (this is the base part number and controls the sequence in the parts price list) can vary from one to four. The number of digits of the second set of “N” digits can vary from one to three. Examples of common hardware would be X-5-1, X-22-16, X-125-3, and X-6050-12.

A new part number series was implemented in April 1999. Part numbers follow the format GM99999-XXX where GM is fixed, the 9s indicate a four- or five-digit numeric base component of the part number (used as the primary sort field), and the -XXX indicate an optional suffix. Some examples of suffixes follow: BLK=black, K=kit, A=assembled, and P=packed. Suffixes differentiate parts similar in size or color.

Literature 101

Format of publication part numbers is typically **LL-NNNN-LL** or **LNN-NNN**. Where “L” represents alpha (letter) characters and “N” represents numeric digits. The primary order is by the numeric digits after the first hyphen and secondary by the suffix digits after the second hyphen. Examples of typical publication numbers would be MP-5004, and M12-117. Publications with a zero “0” as the first digit after the hyphen will be listed without this character. For example, publication M12-014 would be listed in this Parts Price List as M12-14.

Note that some publication descriptions contain abbreviations as follows:

O/M	Operator’s Manual	O/I/M	Operation/Installation Manual
I/M	Installation Manual	P/C	Parts Catalog
S/P/M	Service/Parts Manual	S/S	Specification Sheet
S/M	Service Manual	PB	Parts Bulletin
SB	Service Bulletin	W/D	Wiring Diagram
TT	Instructions for Kit
