

PARTS BULLETIN

Original Issue Date: **4/95**

Model: **Battery Charger Accessories**

Market: **Automatic Transfer Switches**

Subject: **Battery Charger Assembly Replacement**

The factory has introduced an improved automatic battery charger for the ATS product line. New battery chargers are factory set to 12- or 24-volt output and require no customer adjustment. Old battery chargers, identified by a 12- to 24-volt selection switch on the side of the

assembly, are no longer available. If replacing an old battery charger, refer to the following table for replacement kit part number. Use the installation instructions supplied with the kit. This change will be reflected in parts catalogs as they are updated.

Input Voltage (AC)	Output Voltage (DC)	Old Charger Assembly	New Battery Charger Assembly Kit		
			Automatic Transfer Switch Model
