

Setting up a Dial-Up Connection

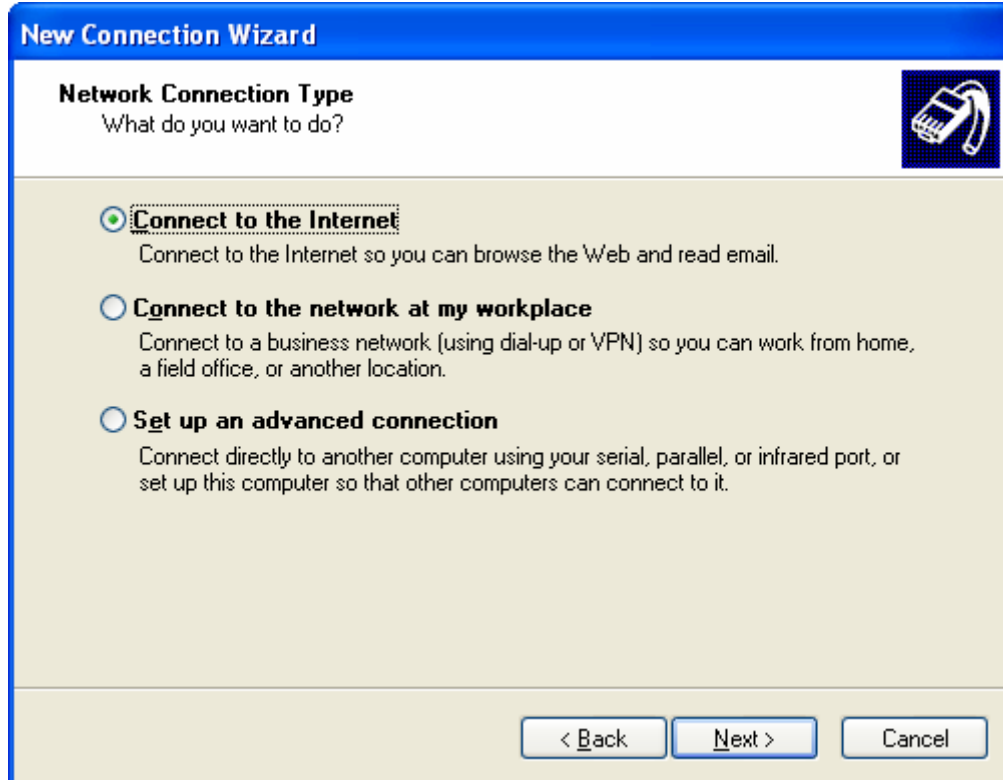

Open the New Connection wizard from;

Start, All Programs, Accessories, Communications, New Connection Wizard

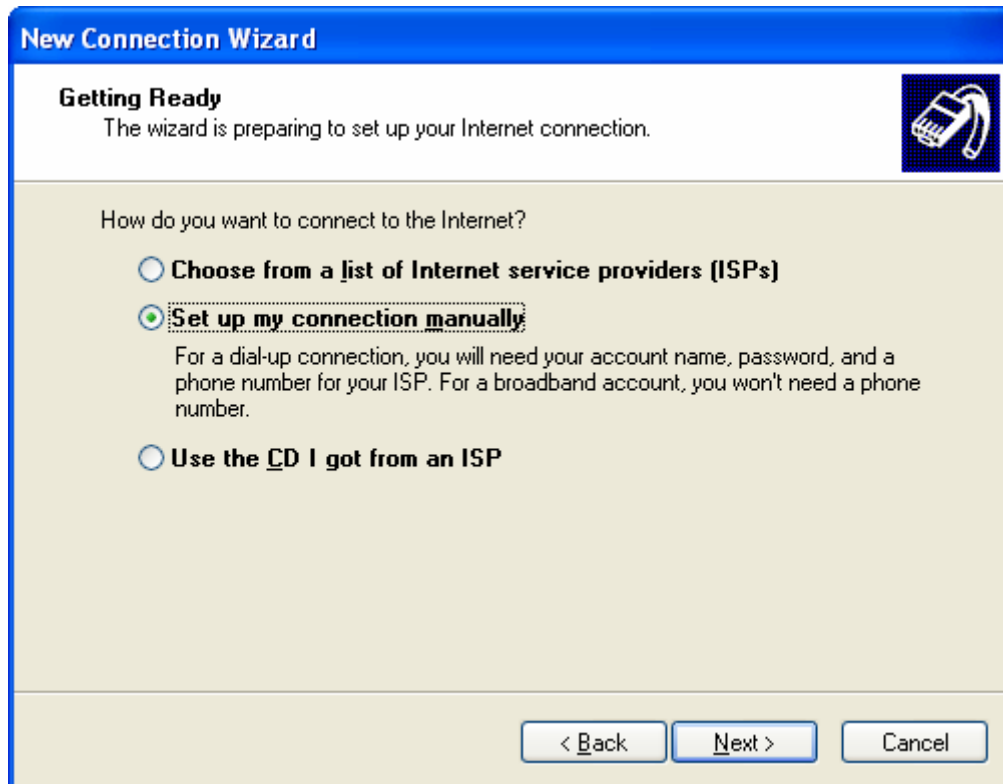

Select **Next**.

Select **Connect to the Internet**.

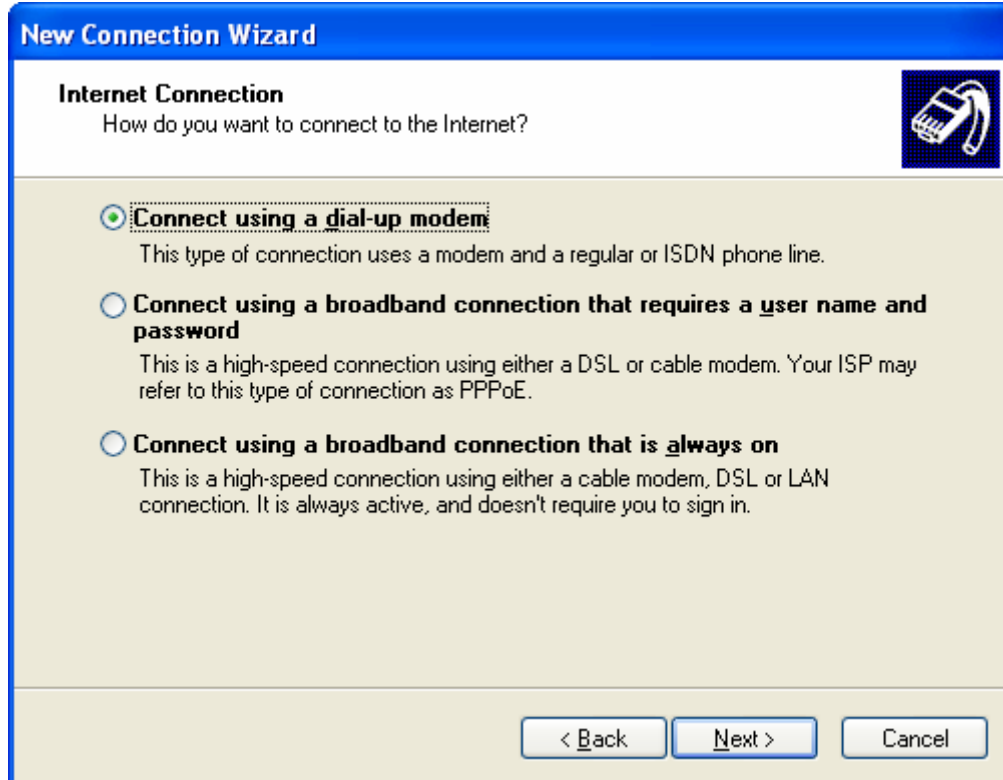

Select **Next**.

Select **Set up my connection manually**.

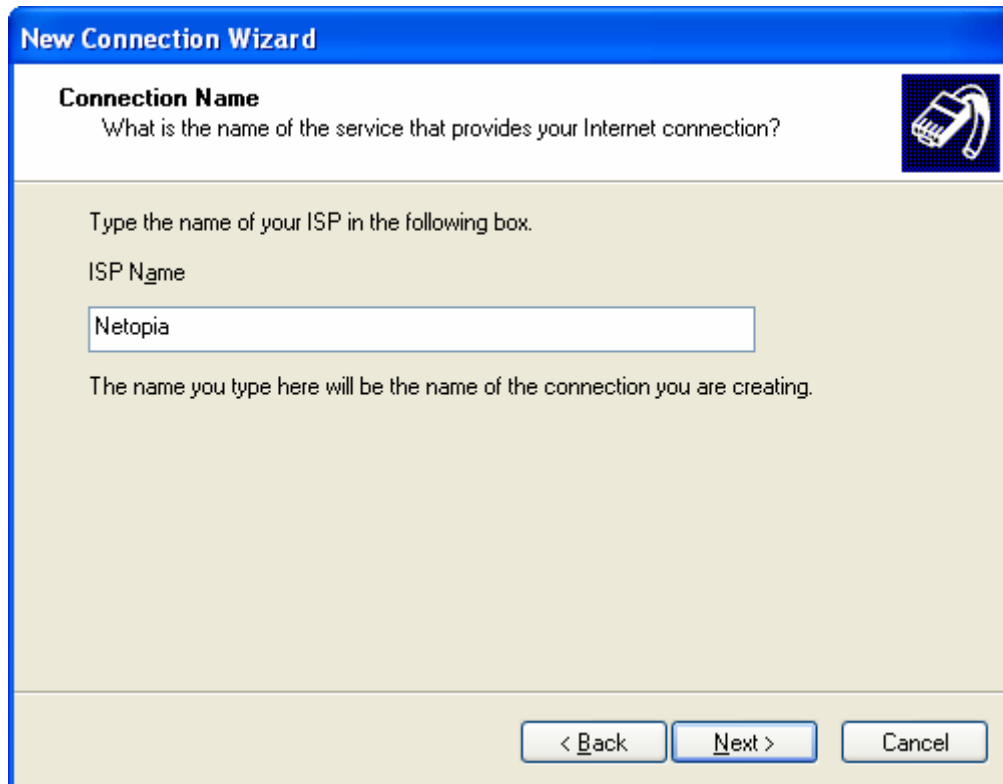

Select **Next**.

Select **Connect using a dial-up modem**.

Select **Next**.

Provide a name for the new connection.

The image shows a Windows XP-style dialog box titled "New Connection Wizard". The title bar is blue with white text. The main area has a light beige background. At the top, there's a section titled "Connection Name" in bold, followed by the question "What is the name of the service that provides your Internet connection?". To the right of this text is a small icon of a computer with a network cable. Below this, there's a prompt: "Type the name of your ISP in the following box." followed by the label "ISP Name". A text input box contains the word "Netopia". Below the input box, there's a note: "The name you type here will be the name of the connection you are creating." At the bottom right, there are three buttons: "< Back", "Next >", and "Cancel". The "Next >" button is highlighted with a blue border.

New Connection Wizard

Connection Name
What is the name of the service that provides your Internet connection?

Type the name of your ISP in the following box.

ISP Name

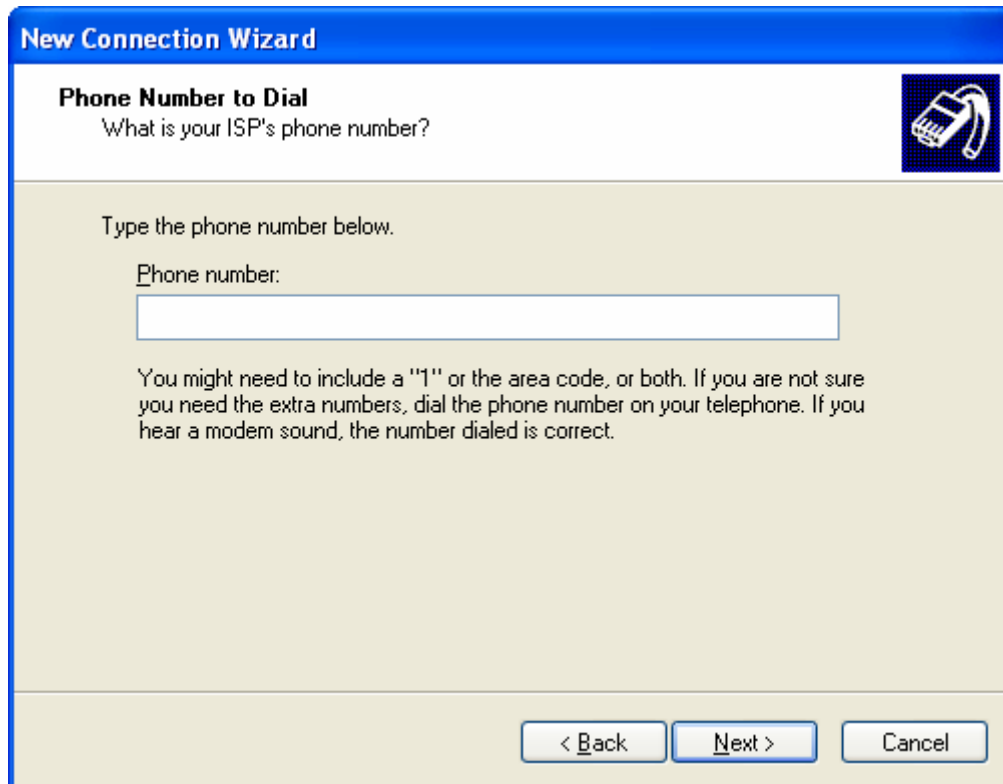

Netopia

The name you type here will be the name of the connection you are creating.

< Back Next > Cancel

Select **Next**.

Enter the phone number to call for this connection.

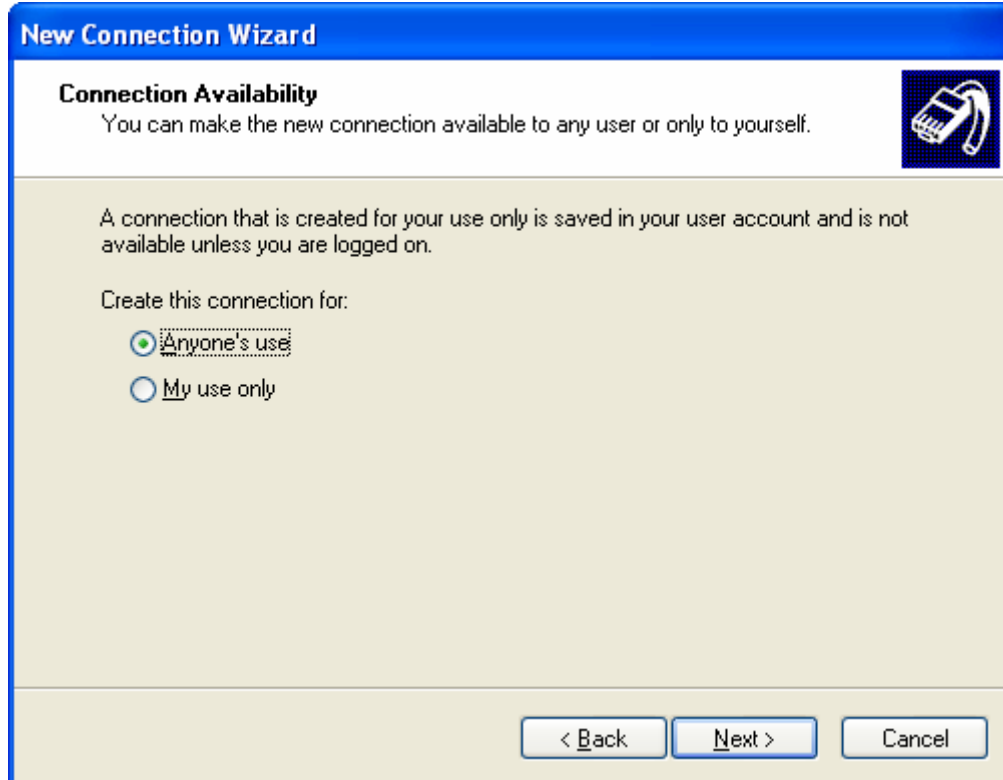

The image shows a Windows-style dialog box titled "New Connection Wizard". The main heading is "Phone Number to Dial" with a subtitle "What is your ISP's phone number?". In the top right corner, there is a small icon of a telephone handset. The main area of the dialog is light beige and contains the instruction "Type the phone number below." followed by a label "Phone number:" and an empty text input field. Below the input field, there is a paragraph of text: "You might need to include a '1' or the area code, or both. If you are not sure you need the extra numbers, dial the phone number on your telephone. If you hear a modem sound, the number dialed is correct." At the bottom of the dialog, there are three buttons: "< Back", "Next >", and "Cancel".

You need to enter a number in this window, you can change it later if needed.

Select **Next**.

Select **Anyone's use**.

The image shows a Windows XP-style dialog box titled "New Connection Wizard". The title bar is blue with white text. The main area has a light beige background. At the top left, the text "Connection Availability" is bolded, followed by the instruction "You can make the new connection available to any user or only to yourself." To the right of this text is a small icon of a network card. Below the instruction, there is a paragraph explaining that a connection created for personal use is saved in the user's account and is not available to others unless they are logged on. Then, the text "Create this connection for:" is followed by two radio button options: "Anyone's use" (which is selected with a green dot) and "My use only" (which is unselected with a blue dot). At the bottom right, there are three buttons: "< Back", "Next >", and "Cancel". The "Next >" button is highlighted with a blue border.

New Connection Wizard

Connection Availability
You can make the new connection available to any user or only to yourself.

A connection that is created for your use only is saved in your user account and is not available unless you are logged on.

Create this connection for:

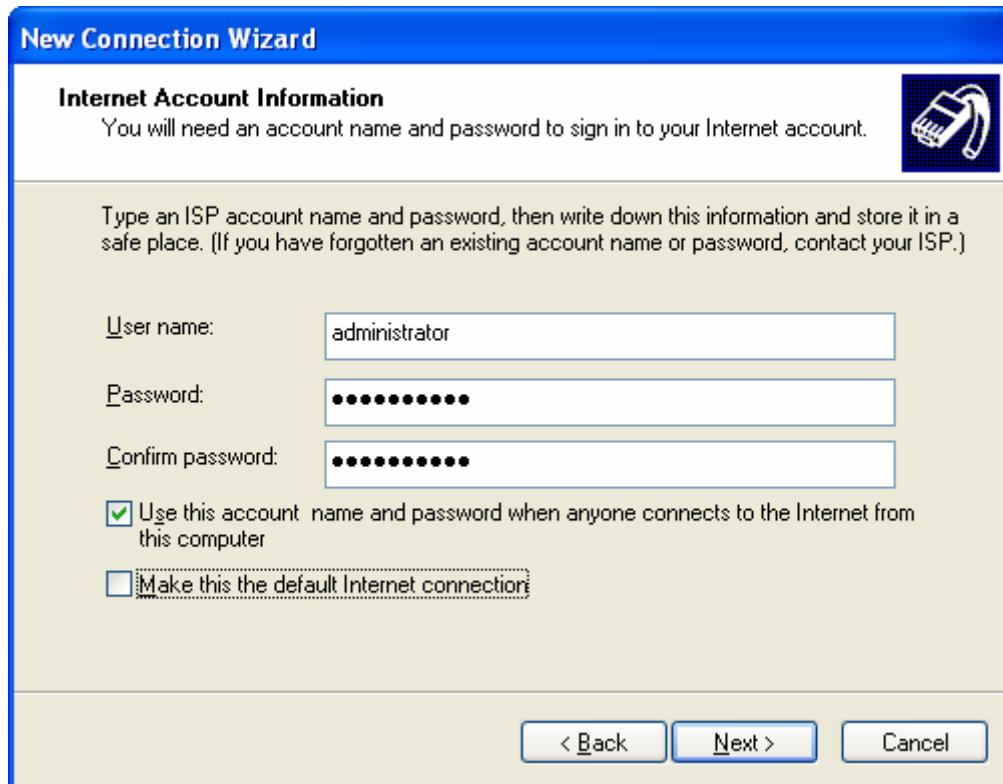

☒ Anyone's use

☐ My use only

< Back Next > Cancel

Select **Next**.

Enter the login information you are going to use to connect.

The image shows a Windows XP-style dialog box titled "New Connection Wizard". The main heading is "Internet Account Information". Below the heading, it says "You will need an account name and password to sign in to your Internet account." and includes a small icon of a computer and a network cable. The instructions state: "Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)". There are three input fields: "User name:" with the text "administrator", "Password:" with masked characters, and "Confirm password:" with masked characters. Below these fields are two checkboxes: the first is checked and labeled "Use this account name and password when anyone connects to the Internet from this computer", and the second is unchecked and labeled "Make this the default Internet connection". At the bottom right are three buttons: "< Back", "Next >", and "Cancel".

New Connection Wizard

Internet Account Information

You will need an account name and password to sign in to your Internet account.

Type an ISP account name and password, then write down this information and store it in a safe place. (If you have forgotten an existing account name or password, contact your ISP.)

User name: administrator

Password:

Confirm password:

☒ Use this account name and password when anyone connects to the Internet from this computer

☐ Make this the default Internet connection

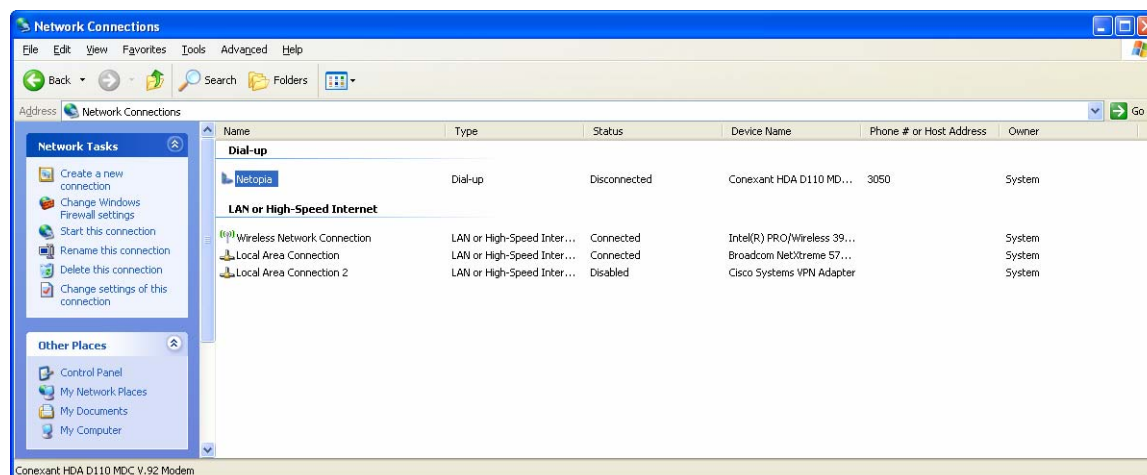

< Back Next > Cancel

Remove the check from Make this my default Internet connection.

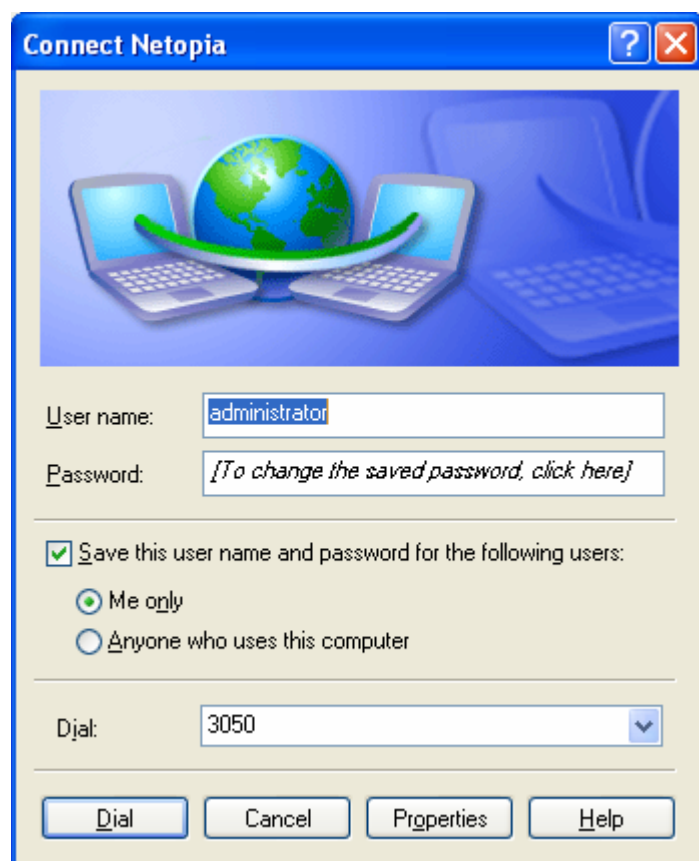

Select **Next**.

You should have the successfully completed the connection dialog box, select **Finish**.

On the desktop of your computer, there is an Icon labeled **My Network Places**, right click on this and select *Properties*. The following window is displayed.

Double click on the **Netopia** dial-up connection, and the following window appears. Modify any parameters you need to, such as phone number if necessary and click on dial.

End of document.
