Title: E-Controls GCP Software/Password

Model(s) GGLA, GGLB and GGHG, GGHH (starting with Spec L)

Background/Description:

The E-Controls software, also referred to as GCP software, is used on GGLA/B and GGHG/H (starting with Spec L) models.

This software is used to read engine parameters and fault codes for the GM 8.1L and Ford 6.8L V10 engines used on these models.

To utilize the software, each of these engines uses a different password and interface cable. Both passwords provide read-only access to the ECM.

Corrective Actions:

The E-Controls software can be obtained two different ways, each listed below.

1. Cummins Software Shelf - two versions available*
 - A. PSI Software - this is the older software version originally released for GGLA/B models. ***This version only works with the GM 8.1 ECM**
 - B. E-Controls GCP Software - this is the newest version released for the GGHG/H models ***This version works with both the GM 8.1 and Ford 6.8 V10 ECM**
2. Power Solutions Inc (PSI)
 - A. PSI Parts Dept - 1-888-331-5769
 - PSI E-Controls Software Tool and Cable Kit (p/n 101-554)
 - This is a comprehensive kit that includes software CD, interface cable, driver and cable adapters

The appropriate ECM interface Cable can also be obtained from several suppliers, each listed below.

1. Northern Power Products (NPP)
 - A. NPP Parts/Service Dept - 1-800-284-6247
 - GCP E-Com USB Interface Cable (p/n E2046002)

2. Power Solutions Inc (PSI)
 - A. PSI Parts Dept - 1-888-331-5769
 - PSI E-Controls Software Tool and Cable Kit (p/n 101-554)
 - This is a comprehensive kit that includes software CD, interface cable, driver and cable adapters
3. CAN Capture
 - A. www.cancapture.com
 - Order E-Com (USB-Serial/CAN) cable

When connecting to the Engine ECM, the software will prompt you to enter a password.

For the GGHG/H models (Ford 6.8L V10) use password - **OLXX-0B1S-334Q-03UT**

For the GGLA/B models (GM 8.1L) use password - **NQYX-VK2M-FF3K-XCCJ**
